Mission statement UNIFORM-Agri

To support dairy farmers and their suppliers worldwide with the best and most user-friendly software solutions that helps to build a profitable and sustainable business. We want our herd management software to help produce food in a more efficient way, which is key to be able to feed the growing population.

UNIFORM-Agri herd management system data exchange

Data integration and data validation are key factors

Data integrations with on farm systems and national organizations.

On farm with all sensor and milking equipment manufacturers

Off farm with more than 100 national organizations worldwide

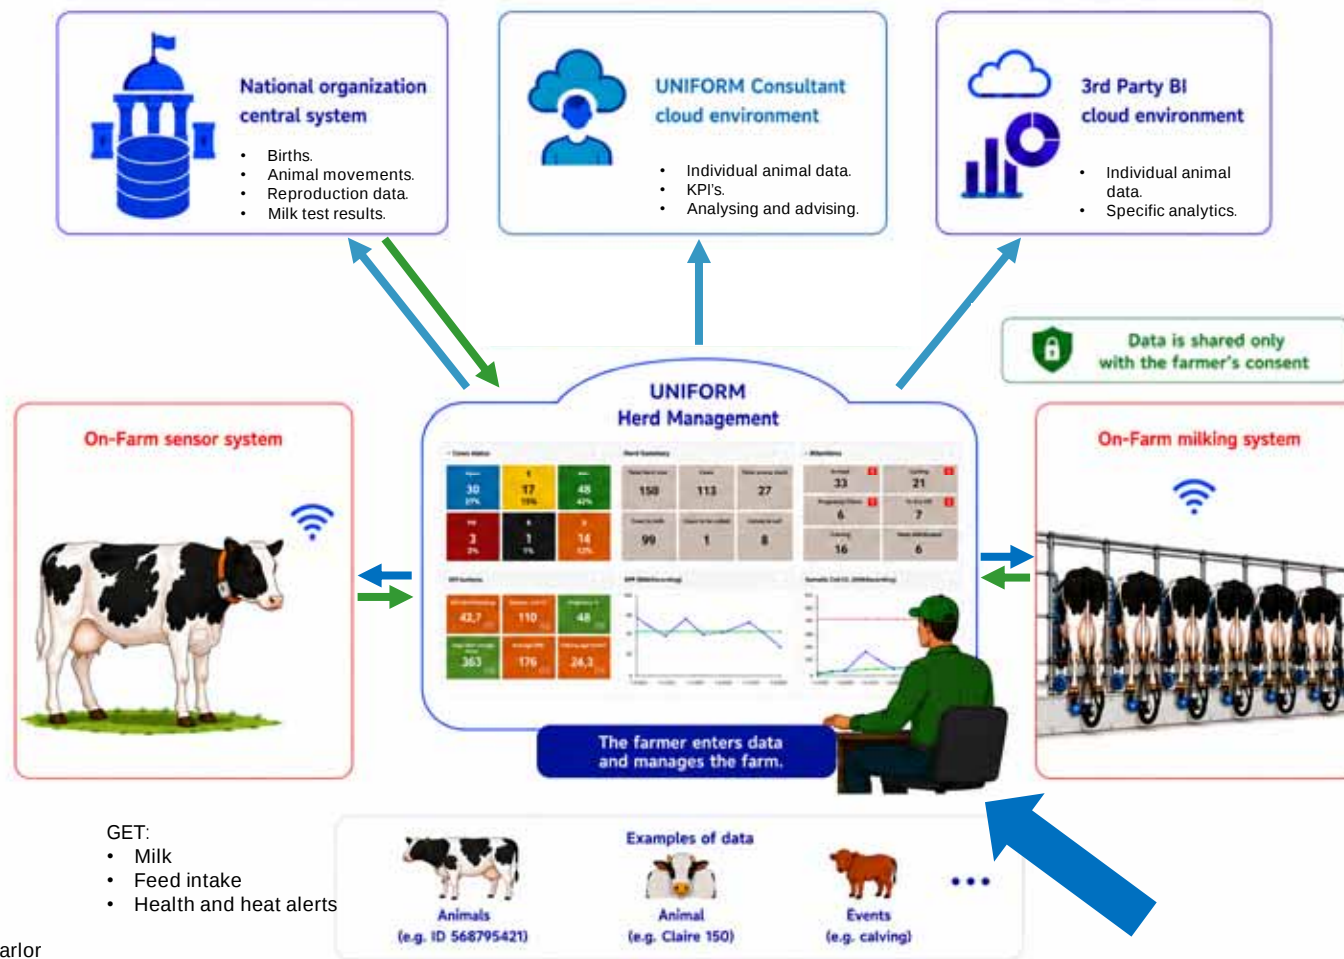

One place of data entry for the farmer

ICAR ADE becomes more important: 8 on farm and 1 off farm interfaces based on the ADE standard. More are coming
